N.V. G.E.B.E. responsible for the production and distribution of electricity and the management of water operations in St. Maarten has a vacancy for a:

Inspector HSE and Security

Purpose: To carry out inspection and advise on improvements in conditions and practices for minimizing environmental health, safety and security risks in the company.

Key responsibilities:

- Contributes to the preparation of the yearly operational plan of the section and with the preparation of progress reports. Prepares daily work plans.
- Provides general and technical support to Line Management in fulfilling the responsibility of ensuring adherence to environmental health, safety and security policies and procedures.
- Assesses occupational, security and fire risks and prepares, in conjunction with line management, advice for improvement of conditions and work methods and procedures.
- Gives or assists in the coordination of general safety awareness briefings and talks to the personnel and situation- and job-specific instructions to functional groups. Assists in the implementation of other awareness and preparedness activities such as publications and drills.
- Prepares advice on health and safety aspects of new construction and renovation plans in the design stage and during execution.
- Inspects facilities, equipment and work practices for compliance with health, safety and security requirements; draws up inspection reports including recommendations on corrective and preventive measures; investigates and reports unlawful acts.

Specific knowledge/skills:

- Company activities and processes and associated health, safety and security risks
- Knowledge of risk assessment/ergonomic principles and applications
- Basic knowledge of statistics management
- Relevant laws and regulations/law enforcement agencies and procedures
- Knowledge of traffic rules and signs
- Applicable construction and electricity rules and regulations
- Good command of English and Dutch
- Relevant computer skills
- 3 years experience

Training:

- Bachelor degree (Technical or Industrial Safety Engineering)
- Supplementary training: security management
